

JRLC 5990

Editing Test

This assignment will test your ability to edit a short video story using techniques we've studied in class and lab. You will be able to work on this assignment during class time, but you'll do most of it on your own outside of class.

The instructor will provide you with all of the raw material (script, b-roll, SOTs, graphics, etc.) needed to assemble the video. The material will be contained in a master project folder that you will store on your laptop or portable hard drive.

After editing the video story, you will export it in the correct format to a shared folder in the classroom.

This assignment is worth **25 possible points**. If you miss the deadline, or do not export the video properly, you will get a grade of **zero** on the assignment.

Grading criteria:

- Shot sequences and visual continuity
- Audio/video linkage
- Audio mixing
- Pacing/tempo
- Graphics and titles
